

## Season 2 Episode 15

## The Z Factor

Keith is sitting at his desk in his main office room where he looks over the plans for an invention of his. Keith said, "I just need that lithium from the national museum downtown and my project will be complete. I will then be able to defeat Mason and prove to the world that I am the greatest mastermind genius. They may even give me command of the world. I will shrink Mason and his lab to sub atomic sizes with this ray." Keith looks at the blueprints for a shrink ray. Just then, a white sparkly portal opens in Keith's room and two robots enter. One of them looks like he is wearing a black suit of armor and the other one looks like a giant orb with arms and legs and a small head and it has electric chains wrapped around its body. Keith gives these robots a dirty look and he said, "Who are you and what are you doing here?" The black suited robot speaks in a deep and fearful voice and he said, "You are Keith, aren't you?" Keith said, "Of course I am. What is that to you?" The black robot said, "I am Black Knight and this is Electrosphere. We come from the future. You have something that we need."

Mason is in his lab and he has a wrench and he is tightening a bolt on a machine. Jason walks in and he said, "Whatcha workin' on?" Mason said, "The United States government paid me to build a machine to regulate the power of the lithium substance they are holding downtown. It is just about complete, and they will come here today and send it off there." Jason said, "I thought you didn't give any of your gadgets away." Mason said, "I don't. The government ordered me to build this and they said they would arrest me and have me fined if I didn't build this, so I didn't have a choice." They hear a truck sound and Mason looks at his computer screen and it shows the front of their house. Mason said, "The truck is here." Mason transports the machine to the truck and it is loaded and sent off. Mason stands on the street and he looks at the armored truck as it drives away with his gadget.

Jason and Mason sit on the couch in their living room and they watch TV. They watch a stupid cartoon on the TV that entertains Jason and annoys Mason. The TV is interrupted and the DDD news logo is on the screen. George Ferrier is on the screen and he said, "Hello, I'm George Ferrier of DDD news and we interrupt this program to bring you news of an emergency in downtown. Two unrealistically advanced robots are attacking the national facility downtown where research is being conducted on lithium, a rare substance that was recently invented. The robots are attacking the place and..." The camera is shot out and George Ferrier is knocked down and the cameras are showing the robots. Mason sees that Keith is with these robots and he is standing alongside with them. Mason said, "Jason, we're going downtown. I have a feeling Keith has something to do with this."

Jason and Mason go downtown, and they see people running away in fear as the robots are stealing the lithium and Mason's machine. Mason takes out his remote and he presses a button on it and his battle robot appears from behind him and Mason jumps into the cockpit and takes control of his robot. Mason uses the targeting computer in it to target the evil robots. He fires a few missiles at the robots, but they don't do much. Mason gets close to them and he said, "It's over, Keith. I know what you are up to and it won't work." Keith stands in between the two robots and Keith said, "That guy is just plain wrong. Defeat him!" Mason sees the robots are going to destroy him, so Mason takes out the plasma guns in the robot's fingers and he fires plasma shots at the robots and the shots just bounce off the robots. Black Knight said, "Ha ha, you can't destroy us. We are made of things that won't exist for centuries." Black Knight takes out an electric spike ball with an electric chain and he swings it at Mason and it wraps around Mason's robot and Black Knight whips it around and Mason's robot battle suit gets destroyed. Mason flies out of the robot and he crashes at the sidelines. Mason is defenseless on the sideline and the robots walk to Mason. Black Knight said, "We will end you here and now, so you won't cause us anymore harm."

Another white sparkly portal opens up and a mop-top humanoid robot in a red suit with a red jacket walks out of the portal. Black Knight looks at the robot and he said, "It looks like they've found us." The robot from the portal said, "Leave him alone. It is me you want and not him." Black Knight said, "Why should we be scarred?" The robot takes out a ray gun and he fires it at Black Knight and Black Knight falls over. The robot dashes over to Black Knight and he holds his ray gun up to Black Knight's face. Black Knight said, "You may have won this time but next time, you won't be lucky." Black Knight teleports away and Electrosphere grabs onto Keith and a few crates of lithium and Mason's machine and they teleport away too. The robot sticks out his hand and Mason grabs onto it for support and he is helped up. Mason said, "Thanks, sir. Who are you?" The robot said, "My name is Justin Z. I have come from the future. I will tell you more."

Jason, Mason, and Justin Z are in Mason's lab and Jason and Mason sit on the couch and Justin Z stands up and he tells them about what is going on. Justin Z said, "In my time, humans and robots live together in peace. That is how it was until the evil robot, Elector took power." Justin Z walks over to Mason's computer and he sticks his finger in a round slot next to the control panel and Mason's computer screen shows information about Justin Z and his time. A picture of a bald jagged mouthed tough looking robot appears on the screen. Justin Z said, "This is Elector. He is a dictator of the world in my time. He sent..." Justin Z changes the image to the two robots that were with Keith. Justin Z said, "This is Black Knight and Electrosphere. Elector sent them here from the future to acquire lithium and a machine to control and manipulate its power." Mason said, "Why would he want to do that?" Justin Z said, "In my time, lithium is a very rare substance and not much of it exists. Elector managed to acquire all of it that exists in my time, but he does not have enough of it. He needs more, and he managed to kidnap a time fairy and he forced the fairy to open a time portal into this time where lithium was just created so he can get what he needs to complete his plan." Justin Z changes the image again and it shows a large half-sphere looking down on earth and the earth looks like a wasteland. Justin Z said, "Elector wants to build this machine, so he can make doomsday devices with them, so he can obliterate anyone that points a finger against him. I have come here to prevent Elector from obtaining the lithium so he cannot rule the world."

Mason said, "Can we help you with this?" Justin Z said, "You can. We need to find that guy Black Knight and Electrosphere were with and find where they're hiding and make sure they don't bring the lithium to my time." Mason said, "That will be easy. I know the guy they went with. I know where he lives."

In Keith's place, Keith, Black Knight, and Electrosphere look over the lithium that was stolen, and the machine built by Mason. Keith examines the machine and Keith said, "This machine appears to be able to manipulate the flow of power from the lithium." Black Knight said, "That is exactly what my master wants." Black Knight presses a button on his left wrist and a screen comes on it and it shows Elector. Black Knight said, "Master Elector, we have stolen a large quantity of lithium and a machine that you can use to control and utilize its power with some modifications." Elector said, "Yes! This is perfect. You need to summon the time fairy's portal and you can return to this time and we will put my plan into motion." Black Knight said, "How do I summon the time fairies?" Elector said, "You don't know how to do that?" Black Knight said, "You never instructed us, master." Elector said, "What kind of idiots do I have working for me. Justin Z is a master at opening the time portals and he has a good relationship with the time fairies. You need to find him and make him open the portal. I know he is there."

In Mason's lab, Justin Z sits at Mason's work bench and he quickly scrambles parts and pieces together. Jason said, "What are you trying to build?" Justin Z said, "I am building a trifulator to spot the weaknesses of Black Knight and Electrosphere. Elector is not an idiot. He knows better. He sent two of his greatest agents." Jason said, "Looks like you have some more competition, Mason." Mason said, "He's just here so we can defeat these robots and then he will go home." Justin Z said, "Exactly." Mason said, "I'm still interested, how were you built?" Justin Z said, "I was built by the Craft Research team in the year 2600. I was built after a similar but very primitive robot named, Justin. He is technically my father. Elector was my brother and he was originally called, Justin V. His body was taken over by a virus and it made him go evil and he became Elector and he destroyed my father and he defeated Dr. Livingston, one of my creators." Jason said, "That would sound harsh if you cared about those people. I never cared about two of the fathers I had." Justin Z raises his hands and he is holding a metal cube with a dark blue screen on it. Justin Z said, "It's finished. It can find the weaknesses in the shield allowing us to destroy Black Knight and Electrosphere. Jump on." Jason and Mason jump onto Justin Z's arms and he runs to Keith's place.

In Keith's office, Keith sits at his desk while he comes up with a plan with Black Knight and Electrosphere. Black Knight said, "How could we let this happen? I looked at this plan carefully over and over again." Keith said, "It sounds like your boss doesn't want you anymore." Black Knight said, "I'm one of Elector's earliest friends. There's no way he would do something like this to me." Keith said, "I wouldn't be so sure about that. I've heard stories of people that were friends for twenty years and they turned on each other and they both got themselves destroyed." Electrosphere said, "I don't remember being one of Elector's favorites." A small black robot is in Keith's office and he goes to Keith's desk and gets his attention and the robot said, "Master Keith, we have signals of Jason and Mason approaching your mansion and they are with a futuristic battle robot." Keith said, "That's them. They want to pick a fight here. We

can't let them. Show them what you've got. You robots were meant to serve your master and I will be your master in this time. Rip apart Justin Z and bring Jason and Mason to me."

Jason, Mason, and Justin Z are at the front of Keith's mansion and giant turrets come out from the front lawn and they fire a rapid volley of shots at the heroes. Justin Z blocks all the shots with his hands and they don't damage him at all. Justin Z takes out his ray gun and he shoots at the turret and he destroys it. He leaves Jason and Mason on the street and he walks towards Keith's front porch and more lethal defense systems come on and Justin Z destroys them with his ray gun. Justin Z sees a metal box on the ceiling of the front of Keith's house and Justin Z reaches to it and he grabs it and he crushes it in his hands. A computer voice said, "Security Systems, Offline." Justin Z signals for Jason and Mason to follow him in. The three of them enter. Justin Z said, "Return the machine to Mason and return the lithium to the national institute and no more action is needed." Black Knight and Electrosphere appear in Keith's foyer and they have their weapons aimed at Justin Z. Justin Z uses the gadget he built, and it finds weaknesses in their armor. Justin Z hands the device to Mason and Justin Z jumps and he kicks Black Knight in the lower chin and he downward punches him in the head. Black Knight grabs onto Justin Z's leg and he holds Justin Z upside down. Justin Z shoots at Black Knight in the chest and Black Knight flinches back a bit. Electrosphere takes hold of Justin Z and he sends volts of electricity through Justin Z. Justin Z's eyes shut down and a voice said, "System shutdown."

Black Knight looks at Jason and Mason and he said, "I deactivated Justin Z. What are you going to do about us now?" Jason said, "Actually he deactivated Justin Z and you just stood there and watched." Black Knight said, "It looks like we have a comedian with us. That is just they will be needing in the afterlife." Mason looks at the cube that Justin Z made for weaknesses. Mason sees a weakness in Electrosphere's blue diamond on his upper back. Jason and Mason have a strange telepathic communication between each other and Mason slowly walks to the side and Jason takes a stand at the two robots. Jason said, "Black Knight. Is that the best name they could come up with for you? That sounds like something a six-year-old would come up with. I came up with better names for comic characters when I was five." Black Knight said, "Shut up." Jason said, "No! I will not shut up. I have all the right to speak as you do. Electrosphere is a far more creative name than yours. I would worry about a lawsuit though since there is a game company called that." Electrosphere looks at Black Knight and he said, "What's a lawsuit?" Black Knight said, "I have no idea and don't listen to him. He is just trying to manipulate us into doing something."

Mason walks up a secret set of stairs that are not in plain sight and he climbs up to a balcony where he can get a wide view of the foyer. Mason jumps off the balcony and he lands on the upper back of Electrosphere and he does not touch his electric chains at all. Mason grabs out his fusion cutter and he cuts the diamond out and he jumps off Electrosphere. Electrosphere notices what happened, and he said, "That Mason." Mason tries to run out of the house with the diamond with Jason, but the front door closes and locks. Keith enters the foyer standing in between the two robots. Keith said, "You can't get away that easy." Mason said, "This is ridiculous. You can't expect to win by working with these robots that are made out of

materials you do not know or understand.” Keith said, “I don’t need to. As far as I’m concerned, they are a new breed of humans that exist in the future. Chain them and take them to that warehouse you spoke of.” Black Knight said, “Yes sir.” Black Knight ties up Jason and Mason with a metal chain and they are placed in a white limo with the deactivated Justin Z and they are driven off.

They are brought to a warehouse where they see more futuristic robots assembling weapons and other strange products. Mason said, “I’ve been to a few warehouses, but I don’t think I’ve seen this one. What are they doing here?” Black Knight said, “You are going to be dead after this, so I might as well tell you this now. We have been using time fairies and sending them to this place since 1995 in your time. They find materials that are crucial for us to win our war and they build things with them in this time and they are eventually shipped to our time. We can’t make all this in our time. Justin Z would find out about us and he would try and destroy us. This was not a problem until just recently when Justin Z became a master of time.” Jason and Mason look at each other and they scratch their heads as if they have no idea what Black Knight is talking about. They place Justin Z on a large table and they connect his head to a machine that allows Black Knight to control Justin Z’s body and access his memory. Black Knight tries to find the commands to summon a time portal. A jolt of energy flows through Justin Z and Black Knight does not see that Justin Z is back in motion. Justin Z gets up and he disconnects himself from the machine. Justin Z takes out his ray gun and he fires at the machine and he destroys it. Black Knight said, “You fool! Guards, get him!” Elector’s soldiers come and enter the place armed with plasma rifles and they target Justin Z. Justin Z shoots and destroys a few with his ray gun and he dashes to Jason and Mason and he uses a small red glowing knife to cut the chains and he frees Jason and Mason. Justin Z continues to fight off the soldiers. Jason and Mason see that the soldiers are outnumbering Justin Z. Mason said, “We need to do something.” Jason said, “What can we do? They have weapons that look like things from science fiction movies.” Mason said, “I have an idea.”

Mason sees they brought his machine over to the warehouse and he sees it is loaded with lithium. Mason activates the machine and a needle comes out and it emits a white beam of light. Mason sees there are wheels under the machine that allows it to freely and easily move. Mason passes the machine to Jason and Mason said, “Try to fry as many Elector soldiers as you can with this. I will look at this cube some more and try to find more weaknesses.” Jason quickly runs with the lithium beam generator and he runs in front of some of the robots and he melts them into a liquid. Jason is impressed by what he sees and Jason said, “Now I see why Elector wants one of these so bad.” Jason continues to assist Justin Z at destroying Elector’s soldiers. Most of the soldiers are defeated and Black Knight realizes that they are losing. Black Knight said, “How could the soldiers lose to Justin Z and an idiot boy from centuries ago? I thought Elector sent his best to this time.” Electrosphere said, “The robots run on a wireless network of commands generated from Elector’s lair. Since they are in a time where that lair does not exist, they would not get those commands which would render them to be very stupid.” Black Knight said, “Why am I always the last one to find the flaws of Elector’s plans?” Keith is next to Black Knight and Keith said, “I told you you’re getting replaced.” Black Knight said, “If you want something done right, you have to do it yourself. Come with me, Electrosphere.” Black Knight and Electrosphere walk over to Jason and Electrosphere grabs onto him and Black Knight takes out a gold axe and he hits Jason with it

and he goes flying to the other side of the warehouse. Black Knight said, "You guard the machine. I will go and fight Justin Z."

Black Knight takes out his golden axe and he heads for Justin Z and he is ready to fight him. He swings the axe and Justin Z dodges it and he kicks Black Knight in the gut and he hits Black Knight in the head. Black Knight swings the axe and it hits Justin Z in the middle of his body and it makes a rip in the center of his jacket and it reveals some of his black and yellow insides. Black Knight swings the axe and while Justin Z is looking at his wound. Justin Z jumps over the axe and he kicks Black Knight in the face and Justin Z grabs onto Black Knight's axe and he takes out his ray gun and he fires it at Black Knight's hand and it causes Black Knight to lose grip of the axe and Justin Z takes control of the axe and he slices Black Knight's head off. Keith watches this and his eyes go big in horror and he sees Black Knight's head get chopped off and Black Knight falls to the floor destroyed and circuits pour out. Jason gets up and he wobbles around in pain and he sees that Electrosphere is standing right in front of the needle and he is busy watching the horror of Black Knight's death. Jason wobbles to the machine and he presses some buttons on it trying to figure out how to activate it. He presses a bunch of random buttons and a giant white beam of light comes out and it vaporizes Electrosphere. Mason and Keith see what just happened and Keith's eyes go even bigger seeing two of the greatest robots he had ever known get destroyed in a matter of seconds and one of them from an unlikely hero.

Justin Z turns to the machine and he sees Jason and Mason are standing near it. Justin Z said, "Mason, we need to destroy your machine. We need to destroy all the lithium that exists. You have just seen the hazards it presents just by the fact it exists. We cannot let mad robots like Elector get a hold of this." Justin Z takes out his ray gun and he shoots at Mason's machine and it explodes. Justin Z said, "Remember what I said and take not only that into account but also the dangers of any new substance or element that presents the possibility of catastrophic effects." Justin Z takes out a star and he waves it around in a certain wave by wave of his arms and hands and a white sparkly portal opens. Justin Z walks into the portal and it disappears. Jason and Mason look at each other as they are intrigued by what Justin Z had just said. Keith leaves the warehouse and he said, "This sucks! Why can't any of the robots or people that visit me ever win over the people you guys get. This really does suck." Keith leaves the warehouse. Jason and Mason leave the warehouse too.
